DoctorController.viewAppointmentDetail

it.unitn.healthcore.controller.
PatientController.viewAppointmentDetail

it.unitn.healthcore.business.
AppointmentService.getAppointmet
Details

```
graph LR; A[it.unitn.healthcore.controller.  
DoctorController.viewAppointmentDetail] --> C[it.unitn.healthcore.business.  
AppointmentService.getAppointmet  
Details]; B[it.unitn.healthcore.controller.  
PatientController.viewAppointmentDetail] --> C;
```

The diagram illustrates a dependency between two controller methods and a business service method. On the left, two white rectangular boxes represent the controller methods: 'it.unitn.healthcore.controller.DoctorController.viewAppointmentDetail' (top) and 'it.unitn.healthcore.controller.PatientController.viewAppointmentDetail' (bottom). On the right, a gray rectangular box represents the business service method: 'it.unitn.healthcore.business.AppointmentService.getAppointmetDetails'. Two blue arrows point from the right side of each controller box to the left side of the service box, indicating that both controllers depend on the service to retrieve appointment details.
