

it.unitn.healthcore.controller.
UserController.verifyOtp

it.unitn.healthcore.controller.
UserController.verifyRecoveryOtp

it.unitn.healthcore.business.
UserService.verifyOtp

```
graph LR; A["it.unitn.healthcore.controller.  
UserController.verifyOtp"] --> C["it.unitn.healthcore.business.  
UserService.verifyOtp"]; B["it.unitn.healthcore.controller.  
UserController.verifyRecoveryOtp"] --> C;
```

The diagram illustrates a dependency or call flow. On the left, two boxes represent controller methods: 'it.unitn.healthcore.controller.UserController.verifyOtp' (top) and 'it.unitn.healthcore.controller.UserController.verifyRecoveryOtp' (bottom). On the right, a shaded box represents a business service method: 'it.unitn.healthcore.business.UserService.verifyOtp'. Two blue arrows point from the controller methods to the business service method, indicating that both controllers depend on or call the business service's verifyOtp method.
